Project Title: Black Panther – The World of Wakanda

1. **Project Overview**
    a. The goal of my website is to introduce visitors to *Black Panther* (2018) while exploring its story, visual design, and cultural significance. Rather than simply summarizing the plot, I want to show how the film brings Wakanda to life and why its portrayal of Black identity and representation matters. The site will have six pages covering an introduction, story and characters, designing Wakanda, behind the film, cultural impact and reception, and sources.

2. **Resources**
    a. The primary written content will come from the Wikipedia article at https://en.wikipedia.org/wiki/Black_Panther_(film). Potential visual resources include the film's theatrical poster, character imagery, costume details, and images of Wakanda. I will look for usable images through Wikimedia Commons and official film resources, checking permissions and recording credits. All content and image sources will be listed on the sources page.

3. **Audience**
    a. The site is intended for people interested in Marvel, filmmaking, design, and representation in media. Visitors will not need to have seen the film or understand the larger Marvel Cinematic Universe. Since this is a class project that may become part of my portfolio, instructors, classmates, and prospective employers may also view it. The content should be approachable, visually engaging, and easy to navigate.

4. **Message**
    a. I want visitors to understand *Black Panther* as more than an entertaining superhero film. The site will emphasize how its characters, world-building, and creative direction provide an opportunity to explore Black identity, culture, and representation. Visitors should leave with a greater appreciation for both the story on screen and the creative work behind it.

5. **Tone**
    a. The tone should feel powerful, thoughtful, and celebratory. I want to capture the excitement of entering Wakanda while treating the film's cultural themes with

care. The writing should be clear and accessible, with short sections that encourage visitors to explore rather than feel overwhelmed by information.

6. **Visual Style**
    a. I envision a cinematic design with a primarily black background, purple accents, and selective touches of gold. Large images and bold headings will create emphasis, while readable body text and generous spacing will keep the content organized. The visual direction will draw from Wakanda's combination of advanced technology and cultural tradition. Subtle geometric details could reference specific costumes or architecture from the film. The design should remain consistent across all six pages and adapt to both desktop and mobile screens. For visual inspiration, I would include the theatrical poster to demonstrate the cinematic mood, an image of Wakanda to show its architecture and technology, and a costume detail to illustrate color and pattern. Each reference will include a brief caption explaining what it contributes to the design direction.
